**PETERPAN**  
SEAFOODS, INC.

# ALASKAN KING CRAB

(Paralithodes camtschaticus)

## BUYER'S INFORMATION

King crabs are large spider crabs found in the northernmost waters of the Pacific Ocean, from Alaska to northern Japan. King crabs average 6 to 8 pounds each but sometimes grow as large as 20 pounds. Peter Pan Seafoods is involved almost exclusively in the Bristol Bay fishery which produces the highest quality crab.

King crab is landed whole, immediately cooked, then split and cleaned by removing the gills and viscera and discarding the top shell. The remaining two pieces, which are made up of the legs and claws, are called sections or clusters. These bulk packed sections are the basic product from which all other king crab products are made.

## FORMS

40 lb. Bulk Ocean Run Clusters

## NUTRITION

|                       |                  |
